# Tirth Makadia

**Java Backend Developer & Cloud DevOps Enthusiast**

Gujarat, India | +91 99791 08026 | tirthmakadia2006@gmail.com | LinkedIn | GitHub | LeetCode

## Career Objective

Aspiring Backend Engineer with a strong foundation in Java, Spring Boot, and Microservices Architecture. Interested in designing scalable, secure, and reliable backend systems, with a focus on System Design, cloud-native technologies, and DevOps practices.

## Experience

**Backend Engineering Intern** **May 2026 – Jun 2026**
*9Series Inc.* *India*

- Developed backend components for an AI-powered test case generation platform using Java and Spring Boot, supporting automated code analysis and test-generation workflows.
- Worked with microservices architecture to build modular backend services and support communication between application components.
- Used Docker containers to package and run application components in isolated, consistent environments.
- Contributed to backend integration and repository analysis workflows for generating edge-case test cases and producing test execution reports.

## Technical Skills

**Programming Languages:** Java, SQL, JavaScript, C++
**Backend Development:** Spring Boot, Spring Security, REST APIs, Microservices Architecture, System Design Fundamentals, JWT
**Messaging & Distributed Systems:** Apache Kafka, API Gateway, Service Discovery
**Databases:** PostgreSQL, MySQL, MongoDB, Redis
**Cloud & DevOps:** AWS, Docker, Docker Compose, Kubernetes, CI/CD, GitHub Actions, Linux, Shell Scripting
**Development Tools:** Git, GitHub, Maven, Postman, IntelliJ IDEA, VS Code

## Projects

**CloudWise – Cloud Auto Deployment and Cost Optimization Platform** *GitHub*
Role: Cloud & DevOps
AWS, Docker, CI/CD, GitHub Actions, Python/Django, MongoDB

- Developed cloud resource estimation and pricing comparison logic to recommend suitable infrastructure configurations based on workload requirements and budget preferences.
- Implemented AWS IAM role-based access to enable secure cloud account integration and automated infrastructure provisioning for application deployment.
- Worked on a containerized deployment pipeline covering Docker configuration, EC2 provisioning, application startup, and health checks to streamline cloud deployment.

**Doctor Appointment Management System** *GitHub*
Full-Stack Development, AWS EC2, S3, RDS, Docker, CI/CD

- Developed a full-stack doctor appointment management application with deployed the backend on AWS EC2, hosted frontend on Amazon S3, and configured Amazon RDS for persistent database storage.
- Containerized application components using Docker and implemented a CI/CD pipeline to automate build and deployment workflows.

**Neighborhood Microservices Exchange Platform** *GitHub*
Java, Spring Boot, Spring Cloud, PostgreSQL, Kafka, Docker

- Designed a microservices-based platform for connecting neighborhood service providers with users requesting services.
- Worked on microservices, JWT, API gateway routing, authentication, and Designed scalable architecture with service discovery and config server.
- Used PostgreSQL for persistent storage and kafka for event-driven communication and docker containerized development.

## Education

**B.Tech in Computer Science and Engineering** **2024 – 2028**
*Charotar University of Science and Technology (CHARUSAT)* *Changa, Gujarat*

**CGPA:** 7.51/10 (Through 4th Semester)

**Higher Secondary** **2022**
*Modi School (GSEB)* *Rajkot, Gujarat*
